Dear Dennis:

Did you have a chance to watch the facial recognition video that I sent last week? If not, take a look now at the short video.

NeoFace® WideNet hosted service provides processing of facial evidence coupled with the ability to generate investigative leads rapidly. This solution will assist your detectives by:

- Saving valuable investigative time, which in turn reduces their caseloads
- Providing image enhancements such as pose correction, consolidation of images and improved illumination
- Turning previously unusable images into hard evidence

To learn more about leveraging NEC's NeoFace WideNet to expedite criminal investigations and solve crimes more quickly, check out our recent blog post.

I'm happy to answer questions about NEC's NeoFace WideNet and share ways we can help your agency. Please call or reply directly to this email.

Best regards,

Kelly Gallagher
Sr. Account Manager, NEC Advanced Recognition Systems
